

**“SOLARBEE
MAKES LIFE
A LOT
EASIER
AND WATER
A LOT
BETTER!”**

Ron Saba
Director of Public Works
Town of Bayfield, Colorado

**“WE GOT BETTER MIXING, LOWER THMs
AND NO STRATIFICATION.”**

When Bayfield built their shiny new million gallon water tank in 2007, they wanted the best in every sense of the word. That’s why design engineer Patrick O’Brien urged immediate installation of a SolarBee® water circulator. “He said we’d regret it if we didn’t,” reports Ron Saba, “and he was right.” Saba cites a slew of major advantages that SolarBee keeps on delivering: For starters, it mixes the whole tank completely – so getting valid test samples is quicker and easier than ever. Also, it eliminates water stagnation while reducing chemical and temperature stratification. It even keeps the water from freezing during Colorado’s harsh winters. Most important, Saba says, “SolarBee’s great mixing provides a stable residual. So we use a lot less chlorine – and we keep our THMs well within the EPA’s compliance level.” SolarBee even cleans bio-film off the inner tank’s walls. As Ron Saba says, “SolarBee makes everything easier and better.” Let SolarBee provide the same big advantages for your potable water tanks and lakes.
